FALL 2020 | COLLECTION GUIDE

## 2020 Fall Collection Overview

Framework, Brentano's Fall 2020 collection, uses complimentary hues and interestingly textured fabrics to create a consistent, modern narrative within a space. This series of textiles introduces distinctively constructed anchor fabrics that are both handsome and tactile, while also offering the high levels of performance synonymous with Brentano.

There is a clear vision for the collection's palette that is fresh, contemporary and relevant, comprised of energetic primary tones, clean pastels and useable neutrals. While all the fabrics have an individual personality, there is a distinct color-guided dialogue between them. Like building blocks, they come together to create striking monochromatic interiors or subtle spaces awash with complementary tones.

The Framework collection is hugely versatile and reflects Brentano's mantra of beauty + performance by offering solid upholstery choices, sophisticated indoor/outdoor options and smart panel fabrics. A studied, foundational and collaborative collection, Framework can truly be described as a series of modern classics that refine and enhance any expressive design.

The distinctive, stylish and relevant colors that appear across the whole collection were a particular focus for the design team. As previously noted, the goal was a concentrated, related, monochromatic palette that highlights the tactile and deeply textured personality of each pattern. Curated hues in varying degrees of saturation, add related layers of depth and interest within each similarly toned family.

The tactile relationship between the fabrics was equally important. Read together, there is a unifying aesthetic progression across the collection that is both inviting and intriguing. Sister fabrics Plot, Query and Sequence utilize an updated matelassé construction to create three thoroughly contemporary, complimentary patterns. Their multiple shared colorways and multi-dimensional appeal further enhance their potential for a myriad of creative applications.

## Framework Collection - Talking Points

- The collection is designed by Brentano in collaboration with Gensler, product design consultant
- Insight, Tune and Intuition represent Brentano's intent to introduce chic but practical panel fabrics, and the principles behind Framework made this the perfect collection to uphold this commitment. Fuse further enhances this offering, as it is not only suitable for panels, but also an outstanding indoor/outdoor upholstery fabric.
- Huddle is a rich and inviting luxurious deep pile boucle available in 18 dimensional colorways.
- Freehand and Trace are smart and contemporary anchor fabric whose inviting and tactile aesthetic can be attributed to the same slub yarn. These colorful but discretely flecked companion fabrics, are suitable for residential, hospitality and contract applications.
- Sister fabrics Plot, Query and Sequence utilize an updated matelassé construction to create three thoroughly contemporary, complimentary patterns. Their multiple shared colorways and multi-dimensional appeal further enhance their potential for a myriad of creative applications.
- Scene is sophisticated but approachable, transforming the traditional ideals of plaid and reimagining it in a fresh and accessible manner. Its soft hand encourages closer inspection, revealing the subtle yet tenacious details of this handsome wool blend flannel. Scene is also fully reversible, giving the pattern an even sharper relief on its opposite side.
